

UI/UX Designer Task

UI/UX Design Task: AI Chat Mobile App

- ❖ **Objective:** Design a Mobile AI Chat application that allows users to interact with an AI assistant for everyday needs.

- **Product Scenario:**

Users open the app to:

- a. Ask questions
- b. Get instant AI responses
- c. Generate content (ideas, text, help)
- d. Continue past conversations

- **The experience should feel:**

- a. Simple
- b. Friendly
- c. Fast
- d. Not overwhelming
- e. Platform: *Mobile App (Android or iOS)*

Design Requirements

1. User Understanding (Brief)

Provide:

1. Target users (who would use this app?)
2. 2–3 user problems this AI chat solves
3. Main user goal when opening the app

2. App Structure (Information Architecture)

Define the app's structure.

Possible sections (you may improve this):

1. Chat
2. History
3. Settings / Profile

Show:

1. Navigation style (Tab bar, drawer, etc.)
2. Basic flow

Example: Open App → Start Chat → Ask Question → Get Response → Continue Conversation

A. Welcome / Home Screen

1. App intro or greeting
2. “Start new chat” option
3. Recent chats preview

Goal: Make users comfortable and ready to begin.

B. Chat Screen (Core Screen): *This is the most important part.*

Include:

1. User messages
2. AI responses
3. Message input field
4. Send button
5. Typing indicator (AI thinking...)
6. Option to scroll through chat

Focus on:

1. Readability
2. Message distinction (user vs AI)
3. Long-response handling
4. Comfortable spacing

C. AI Response State

Show how the UI behaves when:

1. AI is generating a reply
2. Response is long
3. Error happens (no internet / failed response)

D. Chat History Screen

1. List of past conversations
2. Conversation titles or previews
3. Start new chat option

E. Settings Screen

Basic settings like:

1. Dark/light mode
2. Clear chat history
3. Account/Profile area

4. UX Considerations (Important):

Your design should address:

1. How users know AI is “thinking”
2. How long responses stay readable
3. How users avoid confusion in conversation
4. How new users understand what to do
5. How the UI avoids clutter

5. Visual Design Expectations:

We are looking for:

1. Clean, modern UI
2. Proper typography scale
3. Good color usage
4. Clear hierarchy
5. Friendly AI personality feel
6. Consistent components (buttons, inputs, chat bubbles)
